Fax 884-4707

## **NYS ICS Training**

**Incident Command System Intermediate- I 300-** The complexity of incident management, coupled with the growing need for multi-agency and multi-functional involvement on incidents, has increased the need for a single standard incident management system that can be utilized by all response agencies. Use of the Incident Command System (ICS) by both public safety and private sector organizations continue to increase across the Country. The ICS is designed to be used for all applications including fires, (structural and wildland) hazardous material incidents, law enforcement operations, search and rescue operations, air, ground and water accidents, mass casualty incidents, natural disasters and planned events.
